

WORKING on our cars and things

At long last Dave Boyer has triumphed over the galactic empire of the city universe and has started construction of his long awaited Garage. Today we witnessed the pouring of 57 yards of concrete for the foundation and floor of said edifice. What a job, they had to pump all the concrete from the end of his driveway to his back yard as they didn't want to possibly break his driveway. Dave says stay tuned for further construction pictures, after curing for 14 days the sticks will fly as the walls go up! Below and in the left column are pictures of todays pour.

Way to go Dave!!!!

Sherwood is making up a new grill for their Arnolt

CHZWHIZ Gets a New Engine! But on the way....

Clean up that bay.
